

YOUR PARTNER IN WATER TESTING EXCELLENCE

WHY CHOOSE WESTGATE LABS

Water quality is crucial for health, safety, and operational success across various applications - from agriculture and intensive horticulture to residential drinking water and recreational use. At Westgate Labs we bring you comprehensive, reliable, and accredited water testing services to ensure that your water meets all required standards.

▶ ACCREDITED TESTING

We are proud to hold accreditations from NATA and PTA, ensuring that all tests meet stringent quality standards.

▶ WIDE RANGE OF TESTS

Whether you're concerned about metals, need a complete drinking water suite, or want to analyse your water for irrigation suitability or microbe analysis, we cover it all.

▶ EXPERT ANALYSIS

Our team of qualified experts use state-of-the-art technology and methodologies to provide you with accurate and actionable results.

WATER TESTING SERVICES

IRRIGATION SUITABILITY TESTING: Analyses water to protect crops and maintain soil health.

DRINKING WATER TESTING: Ensure your tap and potable water is safe from contaminants and meets health guidelines.

MICROBIOLOGY TESTING: Detects bacterial and fungal presence, safeguarding against health hazards.

HEAVY METAL TESTING: Identifies trace heavy metals that could impact both health and industrial processes.

ORGANIC COMPOUNDS TESTING: Checks for harmful organic chemicals in your water supply.

ENVIRONMENTAL AND RECREATIONAL WATER TESTING:

Assures the safety of water in natural and recreational environments.

STORM WATER TESTING: Monitors contaminants in runoff water, helping to manage pollution and environmental impact.

BORE WATER TESTING: Assesses water quality from underground sources to ensure safety and compliance with regulations.

STOCK WATER TESTING: Evaluates the quality of water used for livestock, ensuring it is free from harmful contaminants

HOW TO GET YOUR WATER TESTED

1 CONTACT US:

Reach out to discuss your water testing needs. Our team will help you identify the right tests for your specific requirements.

2 SAMPLE COLLECTION:

Collect your water sample and return it to our laboratory within 24 hours.

3 ANALYSIS AND REPORTING:

Our lab will analyse your samples using the latest techniques and equipment. You'll receive a detailed report with the findings.
